

SchoolBus Manager User Guide:

Register:

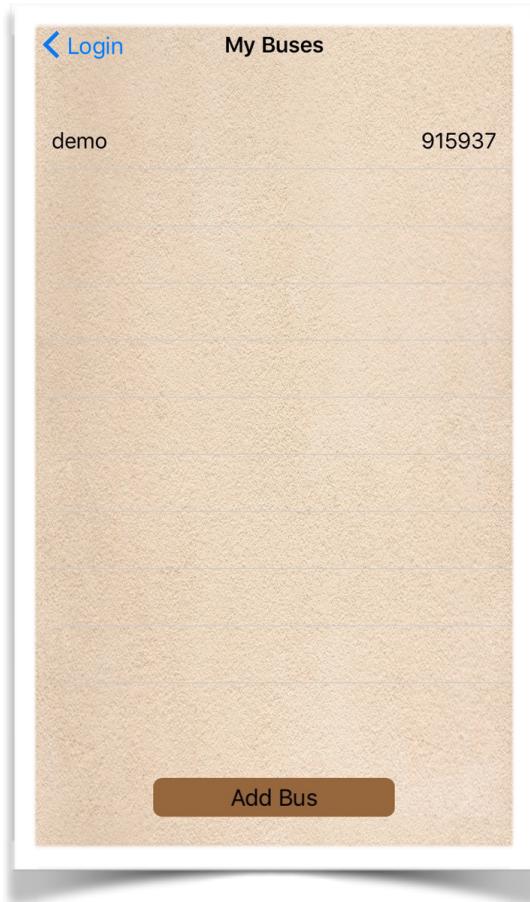

You can choose to either enroll as a parent or bus driver.

Login:

Login with your user ID and password.

For Drivers:

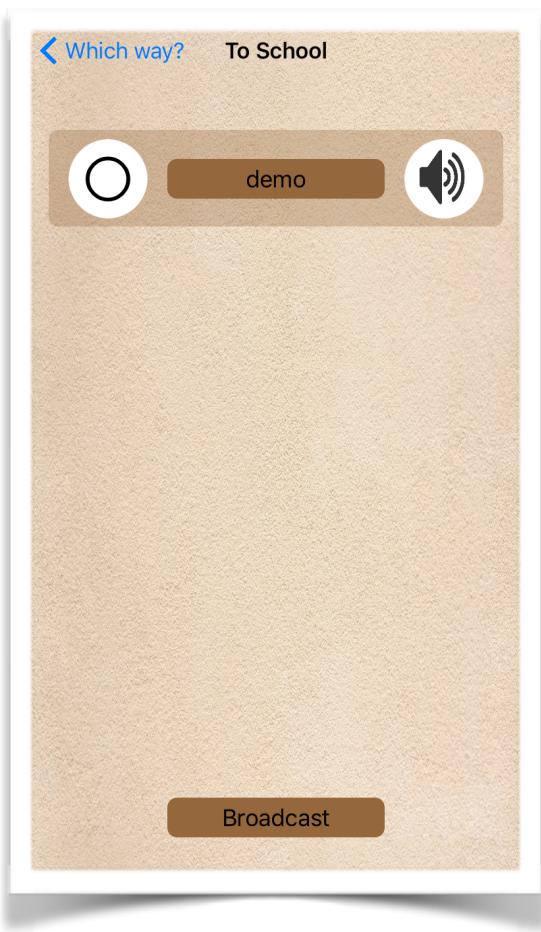

My Buses:

Here are the buses that you currently own, with bus ID displayed on the left and password displayed on the right. Give the password to the parents to let them join your bus. You can also create a new bus using the “Add Bus” button.

Which way?

This interface allows you to begin your journey by choosing whether if you are carrying children to school or picking them up from school. The “sort” function allows you to modify the order in which the children appear in a list.

Bus ride:

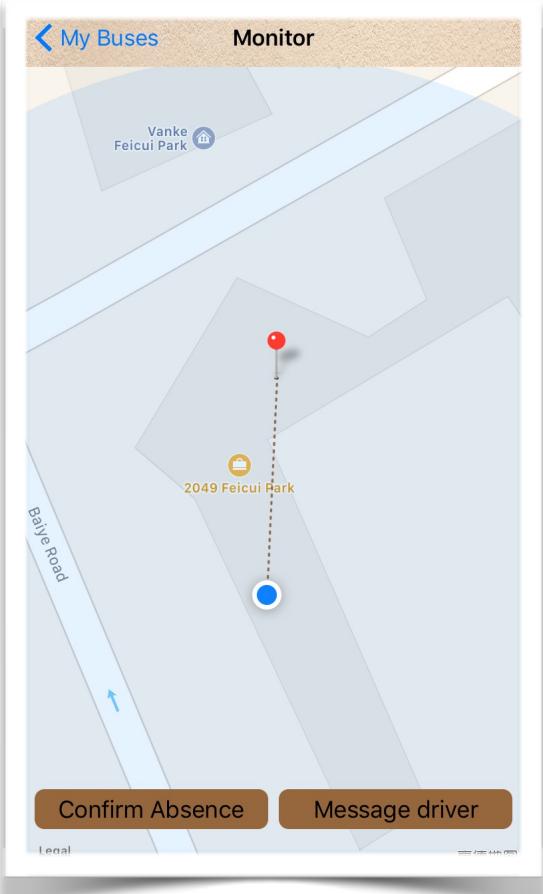

You will come to this interface after selecting the type of ride. Here, you can click on the left button to inform the parents that you have picked up the child, and click it again to indicate that you have dropped this child off of the bus. The name of the child appears in the middle, which in this case is called "demo." Tap the child's name to privately send messages to the child's parent. Tap the horn button to inform/rush the parents whose children are not yet abroad. Finally, use the "broadcast" button to broadcast a message to all parents. Click out of this interface to end the ride and terminate location sharing with parents.

For Parents:

My Bus:

This list is the list of buses that are available to your children. Tap on "join bus" to find a specific bus and enter the password to join it. Tap on one bus to specify that your child is currently using this bus. Tap that bus again to enter the monitor interface.

Monitor:

When the driver is driving, location sharing is enabled and you will see the bus's location (indicated by the red pin.) Your own location is specified by the blue dot. You can click on the message button to send a message to the driver. You can also tap the "confirm absence" button to tell the driver that your child won't be taking the bus today.
